**2. Citations and explanations (Rule 70.7)**NOVELTY (N)INVENTIVE STEP (IS)

EP 734902 A, GEROH GmbH

There is no disclosure in this document of a container handling apparatus which has a main frame movable laterally from one side of a container and over the container.

This involves less room needed to be available adjacent the container. In a crowded container terminal, side rather than end access is preferred, if not essential, since container ends may abut each other.

Thus the invention set out in the claims satisfies the requirements for novelty and inventive step.

INDUSTRIAL APPLICABILITY (IA)

The invention set out in the claims of this application satisfies the requirements for this criteria.

**VII. Certain defects in the international application**

The following defects in the form or contents of the international application have been noted:

Claim 11 does not comply with the requirements of Rule 6.2(a) since it relies on reference to the description and drawings.

The demand must be filed directly with the competent International Preliminary Examining Authority or more Authorities are competent, with the one chosen by the applicant. The full name or two-letter code of that Authority may be indicated by the applicant on the line below:
